Knee Buddy Extender
#925.KBEX

Patent Pending

Zero Degree Knee

- Faster Rehabilitation
- Reduces pain medication
- Back to daily activities sooner
- Better compliance with in-home rehab

Indications: Post-Op: Total Knee Replacement, Ligamentous reconstruction of knee dislocations, Tibia Plateau Fractures, ACL Surgeries, Distal Femur Fractures, Contracture release of HO excision of knee, Hip Dislocation

“The Zero Degree Knee was good to use 4-5 times a day for 15 minutes at a time to relax and obtain full extension.”

Helping Prevent Dislocation Episodes after Anterior THA

ZDK aids in controlling rotation and neutral alignment. Secures the foot and leg post-op while spinal is wearing off

“The ZDK is being used by 20 of our 21 surgeons, and every patient goes home with it. It has been a great tool for getting our patients to recover faster.”

– Lancaster General Hospital
