

Total Knee Rehabilitation

FAMILY OF PRODUCTS

Bone Foam Rehab products have helped 100,000+ patients nationwide recover faster with lower risk of post-op complications.

Maintain optimal postoperative knee extension.

- Create full knee extension by elevating the heel
- Keep toes pointed toward the ceiling in a neutral position
- Prevent internal and external rotation of the hip and eliminate associated flexion at the knee

#925.ZDK
Zero Degree Knee
Disposable (Box of 12)

Effective tool patients can use for their in-home exercises, along with their knee extension practice.

- Designed to facilitate knee and hip motion after surgery
- Easily perform flexion, abduction, and adduction exercises of the hip
- Hard plastic shell slides easily on any surface

#925.ZDKSLIDER
Zero Degree Knee Slider
Disposable (Box of 10)

Maintain knee extension and elevation to reduce edema for faster recovery.

- Proper elevation reduces edema and provides an opportunity for faster rehabilitation
- Prevent internal and external rotation of the hip and associated knee flexion
- Extension block elevates the heel and facilitates full knee extension
- Gives patients the opportunity to be more consistent throughout their rehab

Also available for patients to purchase at www.mycomfortmd.com

2-in-1
